- Organize & custom sort Multi-page PDF files using Revit Parameters

Enhanced Revit / Newforma Document Control integration

- Easily publish PDFs and add them to Newforma Document Control in one step
- Synchronize Revit parameters
- Enhanced control over sheet revisions and issuances

QUESTIONS & ANSWERS

Q: Does Newforma update the Revit revision list to check the revisions as issued?

A: Newforma does not update the Revit revision list.

Q: How do you add the ribbon to Revit for Newforma?

A: Through Newforma Project Center, choose preferences from the ribbon then choose preferences from the list. In the Project Information link section, check all version of Revit that you have installed on your machine.

Q: Is Eleventh Edition available now?

A: Yes, Eleventh Edition is currently available. [Click here](#) for upgrade information.

Q: Does Newforma make the pdf output folder by default in the project directory?

A: Once you set the root folder, Newforma will add PDFs to it or if you select the option to Manage Folder (in publish settings), Newforma will create a new subfolder under the root for each publish.
