# EDMS Integration with Newforma

*This webinar is intended for anyone interested in learning about Electronic Document Management System (EDMS) Integration with Newforma Project Center Eleventh Edition.*

Continue to bridge the gap and build transparency between project files stored across multiple systems and file repositories. Take electronic document management to the next level by incorporating it with the new EDMS Integration feature in Newforma Project Center Eleventh Edition!

## TOPICS COVERED

- Add an EDMS Project to NPC - *Adding project folders from the EDMS file system is quick and easy*
- Work with EDMS Files/Folders - *Check Out/In and Modify through the NPC Tasks box or right-click context menu*
- Project Email - *Save email and attachments from Outlook directly to the EDMS repository*
- Search - *In addition to NPC search capabilities, also search EDMS properties*
- Viewer/Markup Tools - *Don't have a CAD application installed? Use the NPC viewer to view 2D CAD files*
- Transfer Files - *Using Newforma Info Exchange for sending files stored in EDMS*
- Create a Record Copy - *The Record Copy tool in NPC makes it simple to make a snapshot of a project or folder*

## QUESTIONS & ANSWERS

Q: Are there plans to extend the support to other EDMS systems such as Box.com?
A: We are working on extending to integration with other systems including cloud storage solutions such as Box.

Q: Will this work with both hosted as well as on-premise SharePoint?
A: Currently we support on-premise SharePoint.

Q: How does the licensing work for the ProjectWise integration? Do you need a license for both ProjectWise and Newforma?
A: You will need a license for both ProjectWise and Newforma Project Center.
